NEWS RELEASE

UPDATE ON TECHNICAL REPORT ON BISONI MCKAY VANADIUM PROPERTY

Further to the news release dated March 1, 2016 Stina Resources Ltd. (the “Company”) has the following update to the technical report on the Company’s Bisoni McKay vanadium property in Nevada originally dated October 23, 2015 (and certified October 23, 2015), which has deficiencies with respect to NI 43-101.

The Company has been working with Ed Ullmer, P.Geo (QP) to rectify these deficiencies, and believes that it is very close to having a fully compliant report for re-submission and review by the BCSC. In addition to the corrections by Ed Ullmer, the Company has engaged E.L. Hunsaker III, CPG 8137, of Hunsaker Inc. to act as an additional QP for the report, in the capacity of a reviewer for of NI 43-101 compliance.

The Company expects to re-submit the amended and reviewed technical report by the end of July, and will provide further updates as information becomes available.

On behalf of the Board of Directors,

“Jim Wall, CEO”
