## NEWS RELEASE

### Stina Announces Completion of Drilling Program

Stina Resources Ltd. (“Stina” or “the Company”) is pleased to announce that Copper Creek Gold Corp. (“Copper Creek” –TSXV – CPV) has completed the percussion drilling program on the Bandit copper-silver-gold exploration Property located in the Blackwater area of central British Columbia.

Stina is funding this year’s exploration program on the Bandit property. Under the terms of an option agreement, Stina must incur \$2 million in exploration work over a four year period and issue 400,000 common shares to Copper Creek over a three year period to earn a 60% interest in the property. Copper Creek is the operator of the project for the present exploration season.

The program consisted of 15 percussion drill holes (1,402 metres) over part of a 2km X 5km copper, gold and molybdenum anomaly identified during MMI sampling by Copper Creek in the summer of 2011. This area also shows as a coincident magnetic low on BC government aeromagnetic surveys. Samples are being transported to ALS Group in North Vancouver, BC for assaying. Results will be announced when received. The cost for this year’s drilling program is estimated at between \$250,000 and \$275,000.

The Bandit property lies approximately 130 km SSW of Vanderhoof, British Columbia. It is adjacent to claims owned by New Gold Inc. (NGD-T), where New Gold is currently drilling its Blackwater gold project. Blackwater currently hosts a gold resource of 7.1 million oz. indicated and 2.5 million oz. inferred (refer to New Gold Inc. July 18, 2012 news release).

The foregoing geological disclosure has been reviewed and verified by Kristian Whitehead, P.Geo. (a qualified person for the purpose of National Instrument 43-101, Standards of Disclosure for Mineral Projects). Mr. Whitehead is an officer of Copper Creek.
